

Lawrence Speech Services, LLC is a private practice that is dedicated to providing quality speech and language services to individuals. We are qualified to provide evaluations and treatment to any age group or facility that has a need for speech and language services.

Our company is comprised of nationally certified and state licensed speech-language pathologists, as well as South Carolina Bachelor degree- level licensed speech-language pathologist assistants. Our speech-language pathologists are highly qualified to evaluate and treat a vast variety of speech and language disorders and delays. Individuals in need will be taught speech and language skills to improve their overall functional communication. We work with the child's parents and teachers to better ensure carryover of the skills we are targeting in the child's natural environments.

The goal of our company is to provide quality services to children in our surrounding community. We recognize the necessity of speech and language skills in life and we hope to use our professional knowledge and clinical skills to increase the quality of communication for those in need. We are a small company that is focused on our clients by providing comprehensive, genuine, and personal therapy that will enhance the lives of those we serve.

We offer comprehensive therapy focusing on children as a whole. We look to provide as many opportunities for carryover into the natural environment as possible. We continue to address goals until they are fully mastered and successfully carried over into other areas of life, outside the therapy setting. Each therapist comes from a diverse clinical background, enabling us to have experience with a vast array of speech and language delays/disorders.

We are genuine being that each therapist has a sincere passion for serving children with speech and language delays/disorders. We get on the floor and perform play-based therapy, when appropriate, that builds rapport with the children we work with while still targeting their goals.

We encourage families, caregivers and other disciplines to observe therapy and we can provide materials to reinforce what is covered during therapy sessions. All of our therapists are available to answer any questions or concerns that may arise during the course of treatment.

Sincerely,

Felicia Lawrence, M.A., CCC-SLP, Ed.S
